

# Proposal for Skopje Spring Congress 2020

Proposal  
403

**LYMEC Spring Congress, April 3 to 5, 2020 in Skopje**

Author: Venstres Ungdom (VU), Radikal Ungdom (RU), Estonian Reform Party Youth (ERPY) and Jongeren Organisatie Vrijheid en Democratie (JOVD)

Status:  accepted  rejected  transferred to \_\_\_\_\_

The Skopje Spring Congress 2020 may decide:

## 1 **Let's liberalise the foreign exchange market**

2 We believe in the forces of the free market to ensure prosperity and freedom to all. Hence we are  
3 open-minded and have an optimistic approach to the new technological solutions delivered by  
4 the free market. We believe the foreign exchange and money market should be liberalised to  
5 create viable alternatives to the currencies controlled by centralised institutions, as it will e.g.  
6 secure the opportunity of economic growth and monetary stability in countries plagued by  
7 hyperinflation. We will be frontrunners on digital technologies in order to secure social and  
8 economic benefits for millions of people.

### 9 **Considering that:**

- 10 • A well-functioning currency controlled by a politically independent central bank is possible  
11 and can produce low and stable inflation rates.
  
- 12 • Several countries are plagued by enormous hyper-inflation deriving the people from real  
13 economic and social progress.

14

### 15 **Believing that:**

- 16 • The free market is delivering decentralised and innovative solutions.
  
- 17 • Free market solutions can be implemented as viable alternatives to the currencies  
18 provided by government-controlled central banks.
  
- 19 • The opportunities of crypto currency is yet to be fully discovered and in order for this to  
20 happen we need to embrace the technologies of tomorrow.
  
- 21 • We should not be afraid of new technologies and phenomena such as crypto-currency,  
22 micro-financing and mobile-banking.

23 • Free market-driven competition on the issue of hyperinflated currencies will give the  
24 average consumer the opportunity to choose between a variety of possible means of  
25 payment.

26

27

28 **Calls for:**

29 1. A liberalisation of the money market by protecting the freedom to issue and use  
30 crypto-currency, which would secure consumers of the world the freedom to choose and  
31 protect millions of people from the atrocities of hyperinflation.

32 2. An open minded approach to the relatively new phenomenon of crypto-currency.

33 3. A political and legal clarification of what kind of tax crypto-currencies would be subject to.

34 4. An agreement at European level stating that crypto-currencies should not undergo unfair  
35 tax-benefits let alone disadvantages.

36 5. Governments to restrain for acting in ways which would intentionally encourage distrust or  
37 skepticism in crypto-currencies.

38 6. The European Union to be frontrunner on digital technologies for the sake of millions'  
39 well-being and social and economical uprising.
